Harmonisation Interactive Lecture – Preparation Guide (Windows)
FIDUCEO Workshop, IPMA, Lisbon – 25-27 June 2019

Installing the Prerequisites

The Anaconda Python distribution contains everything you need to get started with the interactive lecture (Python 3 with a few additional packages). To install this:

1. Visit the Anaconda downloads page.
2. Scroll down the page and click on "Download" for the Python 3.X version.
3. Run the installer and you should be ready to go!

Getting the Interactive Lecture File

The interactive lecture files are available on Dropbox for download. Do this in the following way:

1. Follow this link to the interactive lecture folder on Dropbox.
2. Download the contents of this folder to your computer, by clicking download then direct download.
3. Unzip the files to a folder wherever you like on your computer.

Opening the Interactive Lecture Files

Once you have downloaded the interactive lecture files you can open them as follows:

1. Find the folder that contains the interactive lecture files in a Windows Explorer window.
2. Hold down the shift key and right-click on the folder.
3. On the menu that appears click "Open command window here".
4. To get started just type in the following command and press return:

```
jupyter notebook
```

A browser window opens and shows the directory contents. Click on an interactive lecture iPython notebook file and play with it!

Uninstalling the Prerequisites

If you would like to uninstall Anaconda after the lecture is complete do the following:

1. Navigate to "Uninstall a Program" in your Control Panel.
2. Uninstall your Anaconda Python distribution from there in the usual way.
